

1. Executive Overview – Competitive Marketing Performance

Report Summary

This page provides a consolidated view of overall sales and return on investment (ROI) across channels. Total sales amount to **\$32K**, with **Online (\$15K, ~46%)** and **Social Media (\$9.3K, ~29%)** dominating revenue contribution. Outlet sales are minimal, while Stores provide moderate support. ROI varies significantly by channel, with **Outlet (18%)** and **Social Media (12%)** outperforming Online (7%) and Stores (5%), highlighting efficiency disparities across the marketing mix

Sample Dashboard for UBS - Comp...

.

Recommendations

- Rebalance marketing spend toward **high-ROI channels** (Outlet and Social Media), even if absolute sales are lower.
- Investigate **Online channel cost drivers** to improve ROI without sacrificing scale.
- Treat Store sales as a **supporting channel**, focusing on conversion efficiency rather than volume growth.

2. Sales by Channel Over Time

Report Summary

This page tracks monthly sales trends by channel. Online and Social Media channels show more consistent activity over time, while Outlet and Store sales remain sporadic and low-volume. Seasonal fluctuations suggest periods of underutilized marketing momentum, particularly outside peak months

Sample Dashboard for UBS - Comp...

.

Recommendations

- Introduce **time-bound digital campaigns** during historically slower months to stabilize revenue.
- Use Online sales trends as a **baseline demand indicator**, with Social Media acting as a growth lever during peaks.

- Avoid overinvestment in channels that show no sustained temporal growth.

Call to Action

Implement a **quarterly campaign calendar** aligned to observed seasonal sales patterns.

3. Total Sales by Channel & Product

Report Summary

Sales concentration is evident across a small subset of products (e.g., Maximus UM-70, UM-11, UM-54), primarily driven by Online and Social Media channels. Several products show weak or fragmented channel performance, indicating uneven product-channel fit

Sample Dashboard for UBS - Comp...

.

Recommendations

- Double down on **top-performing product-channel pairings** through targeted promotions.
- Reassess or retire **low-performing product SKUs** that fail to scale across channels.
- Use this analysis to inform **product-specific channel strategies**, not one-size-fits-all marketing.

Call to Action

Authorize a **product portfolio review** focused on profitability and channel alignment.

4. Sales by Region (Top 10 States)

Report Summary

Sales are geographically concentrated, with states such as **California, Pennsylvania, and New York** leading performance. Channel effectiveness varies by state, suggesting local market dynamics influence channel success

Sample Dashboard for UBS - Comp...

.

Recommendations

- Prioritize **geo-targeted marketing** in high-performing states to defend and grow share.
- Pilot **localized campaigns** in mid-tier states to test scalability.
- Reduce spend in consistently underperforming regions unless strategic presence is required.

Call to Action

Launch **state-level performance reviews** to tailor marketing investment by geography.

5. Return on Investment (ROI) Analysis

Report Summary

ROI varies dramatically by product and state. Several products exhibit exceptionally high ROI (200%–400%+), despite modest sales volume, indicating underleveraged opportunities. Conversely, some channels and regions show near-zero or negative ROI

Sample Dashboard for UBS - Comp...

.

Recommendations

- Scale marketing for **high-ROI products** to maximize profit contribution.
- Identify and correct drivers of **negative or flat ROI**, including pricing, targeting, or channel mismatch.
- Incorporate ROI thresholds into ongoing campaign evaluation.

Call to Action

Adopt **ROI-based performance gating** for all future marketing initiatives.

6. Sales and ROI Over Time

Report Summary

This page links revenue growth with ROI trends across the year. Periods of increasing sales do not always align with improved ROI, suggesting inefficiencies during growth phases

Sample Dashboard for UBS - Comp...

.

Recommendations

- Shift focus from pure growth to **profitable growth** by monitoring ROI alongside revenue.
- Pause or refine campaigns where ROI deteriorates despite rising sales.
- Use this view as a **campaign health dashboard**.

Call to Action

Mandate **monthly performance reviews** using combined sales-ROI metrics.

7. Product Units vs. Revenue

Report Summary

The analysis highlights discrepancies between units sold and revenue generated by product. Some products drive high volume but limited revenue, while others generate outsized revenue at lower volumes

Sample Dashboard for UBS - Comp...

.

Recommendations

- Protect and promote **high-revenue, low-volume products** through premium positioning.
- Reevaluate pricing or bundling strategies for **high-volume, low-revenue products**.
- Use margin contribution, not unit volume, as a success metric.

Call to Action

Initiate a **pricing and margin optimization study**.

8. Outliers & Competitive Volume Analysis

Report Summary

This page surfaces outliers where revenue, units, or competitive volume diverge significantly. These anomalies indicate potential data quality issues, niche market opportunities, or competitive threats

Sample Dashboard for UBS - Comp...

.

Recommendations

- Investigate extreme outliers to determine whether they represent **strategic opportunities or risks**.
- Cross-reference with competitive intelligence to understand external market pressures.
- Use outlier detection as an **early-warning system**.

Call to Action

Assign ownership for **outlier investigation and resolution** within the analytics or strategy team.

Overall Strategic Call to Action (Executive)

- Shift from **revenue-led** to **ROI-led** decision-making.
- Concentrate investment on **high-performing channels, products, and regions**.
- Institutionalize this dashboard as a **monthly executive performance review tool**.
