Report Summary: This page tracks monthly sales trends by channel. Online and Social Media channels show more consistent activity over time, while Outlet and Store sales remain sporadic and low-volume. Seasonal fluctuations suggest periods of underutilized marketing momentum, particularly outside peak months

- Recommendations;
- Introduce time-bound digital campaigns during historically slower months to stabilize revenue.
 - Use Online sales trends as a baseline demand indicator, with Social Media acting as a growth lever during peaks.
 - Avoid overinvestment in channels that show no sustained temporal growth.

Call to Action: Implement a quarterly campaign calendar aligned to observed seasonal sales patterns.
